

ENVIRONMENTAL POLICY

POLICY STATEMENT

Intervet Australia Pty Limited is an animal healthcare company that markets locally produced vaccines as well as imported pharmaceuticals to the Australian market

Recognising the need for ecological sustainability we are committed to the development, implementation and maintenance of appropriate environmental procedures and work methods. Our procedures and work methods will comply with relevant legal requirements that meet animal healthcare industry standards and community expectations.

The commitment to the protection of the environment will be achieved by:

1. Maintaining awareness of legislative requirements.
2. Avoiding, reducing or controlling pollution.
3. Ensuring, through its managers, that all employees are aware of their responsibility to the environment and provide them with adequate leadership, training, systems and resources to fulfil that responsibility.
4. Identifying the various aspects of our activities that have a significant impact on the environment and setting objectives and targets to control those aspects to minimise significant impacts in order to improve environmental performance.
5. Setting appropriate and achievable environmental objectives and targets.
6. Communicating as required with interested parties on relevant environmental matters.
7. Monitoring and reviewing our operations and activities to achieve incremental improvement.

This policy will be reviewed biennially by Senior Management, and if there are significant changes in operations which introduce new environmental aspects.

This policy is available to the public on our website.
